Chatted with Rachel, copied. For now we should stand down on responding to questions about contamination in Rockford MI. Please coordinate with Rachel moving forward.

How do you want to respond to this inquiry since the state is in the lead? What can we say about EPA's role at this point?

Hi Susan,

See below -- this inquiry came in through the Superfund website that we manage here in OSRTI. Given the attention this site has gotten, we wanted to refer this to you directly for a response.

Best regards,

Hello,

My family and I are concerned about the Belmont/Rockford Michigan area (where we live) which has recently been found with hazardous waste from shoe factories. The waste was improperly dumped throughout the Belmont/Rockford area for years. Will these dump sites be listed soon on your site as hazardous? The drinking water is reportedly contaminated throughout the water supply in these areas and is a concern for the residents here in the area and our families.

Here is a link:

<http://www.michigan.gov/deq/0,4561,7-135-3308-450096--,00.html>

The concerning part moving forward is that the disposal sites are still being found and identified and the company that did the dumping hasn't shared or "can't locate" the records of where they dumped their hazardous waste. Seems like it could be a much bigger issue than we are aware of right now.

Any additional attention that can be paid to this area would be very much appreciated!
